# MANAGORE

You have entered the world of Managore and constructed your first buildings? You got acquainted with the Mentor and saw the Guilds in the game? You're not thinking that is it, are you? There is a lot more to see! In Managore there are 57 buildings, 54 units and 18 heroes.

You already know that the first 3 buildings increase the amount of resources gained. You also know that the fourth building increases the amount of free population. But do you know that…

The Bank is a building that will reward you for your early investments.

Develop it in the early stages of the game and take loans as you need, but make sure you can return them as quick as possibly. Then immediately take a lager one, needed for another building.

The Resource market is also very important when a resource is scarce and another is abundant. It fits very well with the Plundering march. Plundering is the best way to acquire the needed resource in the beginning of the game. Plunder as many objects as possible, from a certain type, and use the Resource market to exchange the plundered into a resource that is needed more. There you will find many players looking to do the same and awaiting for your offers. Or maybe you will be waiting for theirs.

It is vital not to rely on your army's strength when defending and not to leave it the Kingdom. There is always an enemy lurking to destroy it. Remember to always send your army on a Patrol march when you are offline. It costs only 100 Food and can be sent for such duration that it will return exactly when you will be able to log-in.

Sometimes, you are not able to load all your resources on to the army and you don't want to leave anything for your enemies? The cargo capacity of units may be increased! This will allow you to use fewer units to carry more resources, especially in the beginning of the game, when you are preparing to start plundering. Also this is useful when you are preparing to wage war in the realm, as you will be able to carry more resources or remains after a battle. Don't forget the unit upgrades on carrying capacity.

Apart from your units' capacity, skills are also an important part of battles. One of the most important skills is Healing. The ability to revive a part of the slain army often causes your battle lines to last a few rounds longer.

Reaching your enemy takes time. Faster marches are the key to success! Faster marches mean that they will reach their destination faster and that you will be able to send more of them, during the time you spend in the realm.

You have probably noticed the Enchanted forests on the map. From them you can quickly gain Battle points and Remains. The first Enchanted forests can be beaten with an army smaller than theirs. Arrange your formation and march on to them.

DON'T WASTE TIME. THE REALM OF MANAGORE AWAITS ITS RESCVER!
