

KhanWars 4.2

What's new in KhanWars 4.2?

Hello, dear players. The time has come for us to make another improvement to your favorite online browser strategy game. The latest version – KhanWars 4.2 – will have some new features which aim at making the game even more exciting and fun. One of the main goals with this new version is to give players new opportunities and chances to develop new strategies and find new ways to outsmart their enemies.

Very often the only way one can avenge himself is to destroy the buildings of the other player. In the new version you will have the opportunity to focus your siege engine forces on a particular group of buildings. Which one will it be, depends entirely on your luck. Furthermore, the Russians' special unit will not give a bonus to all siege engines, but rather it will have a chance of its own to demolish a building.

Upgrading units is a priority for every ruler. The time needed to develop the veteran upgrades, when paying with resources, has been reduced, but the upgrade levels for the siege engines have been increased from 5 to 10. This is done with the purpose of receiving the bonus more evenly. Furthermore, the amount of resources needed to make an upgrade have been differentiated according to world speed.

The Shelter is a building, where you can hide some resources from your enemies. In the new version, the maximum capacity hasn't changed, but to achieve it you now must develop 10 more level, making the building maximum level 20.

Protecting one's army is a way to ensure future security and prosperity. The Tower can now be used to hide more troops, which you can use whenever you need to. From now on, you can hide siege machines, special units and even your Nobleman.

In version 4.2 the percentage of units healed when using clean-up motivation is increased. This allows you to have a larger army and to replenish your formations. Using this option is a good way to restore your strength faster after a long and difficult battle.

The battle drums are beating! Prepare for war! Khan Wars 4.2 is scheduled for release around the 20th of February. Teach your enemies a lesson of tactics they'll never forget!
