

Fall is the perfect time to upgrade from skirts and summer dresses to cozy, fluffy jackets, cashmere pullovers and more things that makes us warm.

Our trend report is saying that layers are the most important thing this season - wearing a turtleneck under a button-down, under a jacket under a coat completely works. Also all shades of blue and green completed with a striking pumps – big yes. Statement pants are our big weapon – more colors = more fun. We simply can resist.

Other thing that will make us happy in the cool weather is the special event called Nightfall. We will have the chance to be in the role of: a vampire, hunter or werewolf. We always dreamt to be in the skin of these magnificent creatures. During the first part of the game you will have to win as many duels on the Fashion arena as you can; during the second part you will have to fight against a Nightfall Queen! All the ladies will be automatically separated into 3 groups – werewolves, vampires and hunters. Each of the groups has a favorite-opponent group which means that if you win a duel against a player from your favorite - opponent group you have a 40% chance to get an emerald in the end of the duel. Otherwise, you have a 15% chance to get an emerald. For example Vampire's team favorite opponent are Hunters, Werewolf's favorite opponent are Vampires. Your main task during the first part is to generate as many wins against players from the rest of the groups as you can!

The second half of the game is when the Nightfall queen appears on the scene. The challenge will be to win a dual against the Nightfall queen and makes her energy goes down only for 3 hours. Every duel won against the queen decreases her energy by 1. If you manage to drop her energy to 0, every lady who has won at least 1 duel against the queen, will receive her incredible outfit as a reward!

*It will be one hell of a month. Are you ready?*
